North State Nursery Co.
Julian, North Carolina

{ Office and Nursery 15 Miles
South of Greensboro, N. C.,
On Highway, U. S. No. 421
Phone, Liberty 7102 }

In Ordering Please use our Stock Numbers to Prevent Errors.

PRICES IN THIS CATALOG cancel all previous lists and quotations and are subject to change without notice. All prices quoted F.O.B. Julian, N. C.

TERMS—Cash with order unless credit has been established with us. In this case, account is due in 30 days from date of invoice.

REPLACING, we agree to supply at once at half list price F.O.B. our shipping point, trees and plants to replace those which may die within one year from date of shipment, from causes other than abuse or neglect or weather conditions, provided the full price as listed herein was paid and if we are notified promptly.

SIZES. Trees or Plants marked 3 to 4 ft. means that they will be 3 ft. or over but under 4 ft. In ordering please mark the size you want just like they are marked in this list.

STOCK especially selected will be priced according to its value without regard to prices shown here.

If trees and plants are sold balled and burlapped, which are usually sold bare root, an extra charge will be made to cover the cost.

A cordial invitation is extended to all to visit our nursery. No service is rendered on Sundays.

OFFICIAL INSPECTION. Each shipment is furnished with a certificate that our nurseries have been inspected by the State Entomologist of North Carolina and found to be free from contagious diseases.

Death Ray Garden Spray

A Self Spreading and Emulsifying Plant Spray Concentrate Containing the Active Principles of Pyrethrum

The popular demand for a non-poisonous insecticide, yet one effective for a wide variety of insects, and a spray material which is simple to use, has been responsible for the increased use of pyrethrum in horticultural spray practice. At the present time, pyrethrum spray materials are largely confined to use on floricultural plants, truck and vegetable crops. They are also used extensively by leading greenhouse men and truck farmers as a contact insecticide in combination with fungicide sprays. Their commercial development is recent, hence their entire field of application can not be foretold. In a number of important insect problems excellent results have been secured.

Death Ray Garden Spray is a complete, self-spreading and self-emulsifying pyrethrum spray. It is not necessary to add a soap spreader or any other wetter as this is already provided in its composition, it requires only dilution with water by the ultimate user. Death Ray Garden Spray assures good coverage with a maximum and prolonged retention of effective insecticidal material on foliage. Its ingredients are non-poisonous and it may be used safely on foliage, when the customary practices of good horticulture are followed. Death Ray Garden Spray is free-flowing at all times and mixes readily with hot or cold and hard or soft water, yielding an excellent emulsion. Death Ray Garden Spray is standardized, stable, and uniform in its composition. It does not stratify or separate, and has been freed from accumulations of inert waxes, gums, and resins. Death Ray Garden Spray contains 95.5% of active insecticidal ingredients.

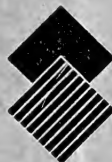

Death Ray Garden Spray is recommended primarily for the control of such plant pests as aphids, thrips, leaf hoppers, white flies, mealy bugs, and various plant bugs, and is also applicable in combatting defoliating insects, such as flea beetles, leaf beetles, red spider, Mexican Bean beetles, and injurious larvae where an effective contact insecticide of this type can be used to advantage. Death Ray Garden Spray is well suited to the needs of the truck and market gardener, fruit grower and nurseryman, and the fancier of ornamental flowers and shrubs as well as for the florists and in the greenhouse.

Death Ray Garden Spray has been rigidly tested at one of the leading agricultural experiment stations for any possible foliage injury, and was found to have a very high safety factor on tender types of foliage and flowers. It contains no mineral oils or other objectional compounds to spot greenhouse plants.

1 oz. Concentrate makes up to 12 gals. of spray.
 In 1 oz. bottles 35c. Quart \$4.50

I N D E X

Flowering Shrubs	1 to 3
